Subject: firebox dimensions

Hi Stef, yup it's me with another question about test reports. I am having a very difficult time determining how firebox dimensions were determined. Many test reports don't provide – length, height, width dimensions – nor do they provide determinations about what is usable versus what isn't. I'm assuming these basic measurements are not CBI. I have also looked at manufacturers manuals, and I don't find these numbers either. Can you help figure out if I should be able to find these measurements? And if so, where I might look? Thanks!

Lisa
